Catherine / Carol / Rob

I spoke with George prior to the holiday in December. At that time I informed George that Northrop Grumman and the Navy could meet with the EPA's management and discuss the progress, findings and work schedules for the onsite and offsite soil and ground water investigation and remedial activities in Bethpage.

The purpose of this email is to open a line of communications to initiate coordination of that meeting.

Following my call with George I called Steve Scharf at NYSDEC and asked Steve to provide George and Carol with a copy of the NG Periodic Review Report for OU2.

Northrop Grumman is open to meeting at the EPA offices or offer our Northrop Grumman office in Bethpage.

Thank You  
Ed Hannon

**Subject:** EXT :Discussion with Northrop-Grumman

Hi Carol,  
I'm glad you brought up involving a geologist at yesterday's "effective meeting" program.

This afternoon I received courtesy call from Ed Hannon, Northrop Grumman. He was inquiring if they could have a meeting at EPA in follow-up to the recent ones, and perhaps have these updates roughly twice yearly. There's a lot of activity at numerous sites (or OUs) and I'd like the opportunity to listen in if one can get arranged. I told Ed I'd let you know and would support a meeting.

Will talk again.  
Rob
